

RFP508795 Fire, Design, Project and System Engineers and Technicians BOA

ANSWERS TO QUESTIONS

(May 8, 2017)

Q1: What is your expectation of where the work will be performed?

A1: The work will be performed at the WIPP Site, 33 miles east of Carlsbad, NM

Q2: Are you anticipating a single award or multiple awards?

A2: NWP anticipates awarding more than one BOA but reserves the right to award one BOA or none.

Q3: Is there an incumbent for this work?

A3: Yes. Edgewater Technical Associates, Value Added Solutions and Stoller Newport News are incumbents on the current Engineering BOAs.

Q4: Do you anticipate that firms will have to submit under all labor categories or can we respond to selected disciplines?

A4: Paragraph 3.03.2.2.3 of the RFP states in part, "Failure to submit two resumes for each the FTEs may not necessarily disqualify the Offeror but the fewer resumes submitted, the higher the evaluated risk that the Offeror can support NWP's requirements during the BOA Period of Performance."
